Who We Are

Polished Technologies, LLC is a hands-on development firm dedicated to software development while adding management consulting to the equation. We understand the importance of being detailed-oriented and we deploy tactics that are focused, efficient and just plain smart.

Core Competencies

Software Development
Our enterprise application development team specializes in cloud-based technology user-friendly, intuitive, and efficient. Whether small web application solution or a large big data solution we have the capacity and experience to build it for our clients.

Data Management
Our team has experience performing the following for our clients: Data governance and data stewardship; Data architecture; Data quality management; Geospatial data management; Data warehousing; Business Intelligence and Analytics; Metadata management; and Extract, Transform, Load (ETL).

Functional Analysis & Assessment
We lean into our Functional Analysis expertise for enterprise software development to root out clients' software development and integration needs. We worked together with stakeholders to determine which technology and workflows best fit the customer requirements. It is our belief that the technology should fit the needs of the stakeholder not the other way around.

Website Development & Mobile Application
We build custom web-based solutions and mobile applications while applying our management consulting expertise to help build more than just technology for our clients. We help build ideas into marketable digital products & platforms and help maintain them.

Strategic IT Staffing
Through our strategic relationships and staffing capabilities, we aim to solve our clients' IT-related temporary and permanent staffing needs supplying Software Developers, Data Engineers, Project Managers, and Functional Analysts.
